ABOUT

Senior Software Engineer with 4+ years of experience building scalable, high-performance SaaS and web applications. Specialized in React.js, Next.js, and TypeScript, with expertise in frontend architecture, performance optimization, and delivering responsive, user-centric solutions. Possesses working knowledge of Node.js, Express.js, and REST APIs, with experience leading Agile deliveries, mentoring developers, and utilizing AI-powered developer tools to improve productivity and code quality.

SKILLS

Technical Skills	React.js, Next.js, TypeScript, JavaScript, Node.js, Redux Toolkit, Zustand.
UI/Styling	Tailwind CSS, Material UI, Bootstrap, Radix UI
Practices	Agile/Scrum, Sprint Planning, Peer Reviews, Mentorship
Tooling	Git, GitHub, CI/CD, Vercel, Netlify, REST APIs, GraphQL
Project Experience	HRMS, SaaS platforms, eCommerce websites, Admin dashboards, CMS

PROJECTS

Tubo.ph — Multi-tenant SaaS HRMS Platform

- Built and maintained the admin panel for a SaaS HRMS platform supporting 1,000+ users across multiple companies and agencies.
- Implemented company and agency registration, role-based access control, device enrollment for attendance, and multi-role dashboards (Super Admin, HR, Employee).
- Delivered leave management, attendance scheduling, time-log consolidation, payroll, and real-time notifications.
- Integrated a secure e-wallet module for salary disbursement and bill payments with a Maker-Checker-Approver approval workflow.

Stonewels — E-commerce Platform

- Built a Next.js and TypeScript e-commerce site for a jewelry brand, covering 100+ products across rings, earrings, necklaces, and custom designs.
- Shipped wishlist, custom design requests, a blog, a ring-size guide, and contact forms to improve user engagement.
- Built an admin CMS for managing products, customer inquiries, custom orders, and blog content, reducing manual operational overhead.
- Used Redux Thunk and Material-UI for state management and consistent UI; contributed to SEO work that grew organic traffic within 6 months.

Immencer 2.0 — Employee Management System

- Built a two-portal (Admin and Employee) system automating records, attendance, leave, and asset management for 100+ employees.
- Developed the employee self-service portal for attendance, leave requests, and training access.
- Built the UI using React.js, TypeScript, and Material-UI, and integrated RESTful APIs for reliable frontend-backend data exchange.
- Worked with Node.js on the backend integration layer to support attendance, leave, and asset data flows between portals.

Azle.io — Multi-channel Customer Support Platform

- Contributed an Internal Chat Module, scroll pagination, and a Customer Merge module to an admin panel used for multi-channel support workflows.

EXPERIENCE

Senior Software Developer — Frontend Team Lead

Rudraak Technologies

Aug 2025 - Present

Remote

- Lead frontend engineering and contribute to technical architecture decisions across React.js and Next.js applications.
- Drive sprint planning, task breakdown, and product delivery in collaboration with product, design, backend, and QA teams.
- Design scalable frontend architectures and reusable component systems to improve maintainability and development efficiency.
- Mentor developers through code reviews, technical guidance, pair programming, and knowledge sharing.

Senior Software Developer

Heliconia Solutions

Oct 2024 - Jun 2025

Vadodara, Gujarat, India

- Lead Agile sprint planning and backlog grooming, working directly with cross-functional teams and clients to keep delivery timelines and priorities aligned.
- Mentor junior developers through code reviews and coding-standards guidance, raising overall code quality and consistency across the team.
- Optimized REST API integration to measurably improve frontend responsiveness, and cut average issue-resolution time by streamlining the debugging and deployment workflow.

Software Developer

Immence Enterprise Private Limited

May 2023 - Sep 2024

Vadodara, Gujarat, India

- Delivered HRM, e-commerce, dashboard, and landing page projects using Next.js and TypeScript, with a focus on performance and SEO.
- Led the migration of a legacy React.js codebase to Next.js, significantly reducing runtime errors and improving API data-fetching efficiency (REST & GraphQL).
- Built a shared library of reusable components adopted across projects, speeding up development for the wider team and enforcing consistent UI patterns.
- Used Node.js alongside Next.js API routes to handle backend integration and server-side logic for HRM and e-commerce projects.

Software Developer

Freelance (Self employed)

Jan 2022 - April 2023

Work From Home

- Built responsive, cross-browser web applications end-to-end for independent clients, from requirements gathering through deployment.
- Managed client relationships directly — scoping work, setting expectations, and delivering on schedule with no intermediary PM.
- Refactored legacy codebases and replaced heavy dependencies with lightweight alternatives, notably reducing bundle size and improving load performance.
- Built and connected Node.js-based backend endpoints for client projects requiring custom APIs beyond standard frontend integration.

Teacher

Prayas Tuition Classes

July 2017 - Oct 2021

Vadodara, Gujarat, India

- Designed personalized lesson plans and tracked individual student progress, communicating regularly with parents on development.

EDUCATION

Bachelor of Engineering, Maharaja Sayajirao University of Baroda.

2014 - 2017
